

KENT STATE
UNIVERSITY
The Centennial Campaign

June 30, 2009

Mr. David Ruller
City Manager
The City of Kent
325 South Depeyster Street
Kent, OH 44240-3697

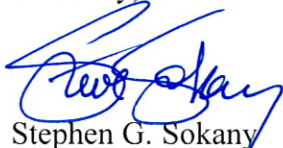

Dear Mr. ^{Dave}Ruller:

On behalf of the students, faculty and staff at Kent State University, thank you for the generous gift of \$1,000 from The City of Kent to the Centennial Campaign Partners Fund. This gift in support of the Centennial Partners program demonstrates a commitment to ensuring that Kent State will continue to provide the finest educational environment possible to assist students in accomplishing their academic goals and dreams. As a Centennial Partner benefactor, this gift will ultimately make a profound difference in the lives of those students who represent the future of Kent State University.

Mark your calendar for the Centennial Celebration and Campaign Kickoff event on Thursday, October 8, 2009 at the Kent State Student Recreation and Wellness Center! In September, we will be sending a formal invitation to join us as we celebrate the achievements of the university and its 100 years of Excellence in Action.

Again, please accept my thanks on behalf of the entire university community. We are so grateful that The City of Kent's philanthropic vision includes the important work here at Kent State.

Sincerely,

Stephen G. Sokany
Associate Vice President for
Institutional Advancement

Dave Ruller - Energy Efficiency Grant Update

From: Bridget Susel
To: Dave Ruller; Gene Roberts
Date: 6/29/2009 9:56 AM
Subject: Energy Efficiency Grant Update
CC: Gary Locke

Good Morning Dave and Gene:

Please see below. The State of Ohio had its energy efficiency application approved by the Department of Energy. The State has not posted specific project guidelines yet, but according to the information below, it is "forthcoming." Based on the five summary initiatives below, the City's energy efficiency retrofit project will most likely fit under the "Making Efficiency Work" as I indicated in an earlier e-mail. Ohio has committed \$8 million for grants in this category. I continue to get the updates and will let you know as soon as grant application guidelines are posted.

Let me know if you have any questions. Bridget

June 26, 2009 – Patt-McDaniel, Shanahan Announce Federal Stimulus Resources for State Energy Program

\$38 Million in Recovery Act Funds Delivered to Ohio for Renewable Energy Efforts

Columbus – Lisa Patt-McDaniel, interim director of the Ohio Department of Development, and Mark Shanahan, energy advisor to Governor Ted Strickland, today announced that the U.S. Department of Energy has approved the state's proposal for use of \$38 million in American Recovery and Reinvestment Act funds for the State Energy Program. The funds will be used to help increase the production and use of renewable energy, reduce greenhouse gas emissions, and create jobs.

"Ohio's interagency efforts to build the framework of our state energy plan have positioned us to fully utilize these Recovery Act resources," Patt-McDaniel said. "These funds assist our state in achieving the goals of the Advanced Energy Portfolio Standard set forth by the Governor and legislature by expanding our state's energy capabilities and setting the stage for sustainable growth and job creation."

With today's announcement, Ohio has now received 50 percent of its total \$96 million in Recovery Act funding for the program. An initial 10 percent of total funding was previously made available to support planning activities. The remainder of State Energy Program funds will be deployed based on Ohio's performance with this allocation.

Specific application guidelines, loan structures, and timelines are forthcoming, and will be available at www.recovery.ohio.gov. Project selection will be conducted in keeping with the Obama administration's guidelines on effectiveness, accountability, and transparency

"Ohio's energy efficiency capabilities will be greatly expanded as a result of this program and the leadership demonstrated by the Obama administration and the Ohio congressional delegation," said Shanahan. "Investments in renewable energy projects will ensure that the economies of our state and country are sustainable for future generations."

Ohio's State Energy Program proposal was submitted by the Ohio Department of Development to the U.S. Department of Energy with guidance from the Governor's energy advisor and input from state agencies including Ohio Air Quality Development Authority, Public Utilities Commission of Ohio, Ohio Environmental Protection Agency, Ohio Department of Transportation, and Ohio Department of Natural Resources. The partnership will develop renewable energy and alternative fuel projects, upgrade the energy efficiency of public and private facilities, and promote innovative state efforts to help Ohioans save money on energy.

The American Recovery and Reinvestment Act funds appropriated to the State Energy Program will enable Ohio to accelerate the goals of renewable energy development, job preservation or creation, and increasing energy efficiency and assistance to Ohioans impacted by current economic conditions.

Updates will be posted to www.recovery.ohio.gov.

Below is a summary of the initiatives in Ohio's State Energy Program:

Developing Renewable Energy in Ohio – \$35 million toward increasing renewable energy projects that will propel Ohio forward in the solar, wind and biomass waste industries, and deploying related technologies in combination with fuel cells and energy storage for electricity, heat, biofuel, and bioproducts.

Making Efficiency Work – \$8 million will fund grants to conduct commercial and residential building retrofits in existing and new construction to attain greater energy efficiency.

Targeting Industry Efficiency – \$15 million will fund grants to manufacturing companies seeking to improve the sustainability of Ohio industry and build expertise and awareness in industrial carbon management projects.

Banking on New Energy Financing – \$30 million will transform the energy finance landscape in Ohio by creating an Energy Alliance and bringing more significant funding to energy efficiency and renewable energy projects.

Setting the Stage for Ohio's Carbon Management Strategy – \$500,000 will be deployed to identify industries and businesses seeking to lessen their carbon footprint, assess the economic impacts, and develop scenarios to provide policy guidance for future energy efficient economic development.

The remaining funds are to be used to ensure appropriate oversight, reporting, administration and implementation over the three-year grant period.
