

City of Kent Sustainable Transportation: An Open House Event

Tuesday, July 9th 5pm-7pm

**Theodore Roosevelt High School, Cafeteria
1400 N Mantua St., Kent, OH 44240**

The City of Kent is working to connect neighborhoods to destinations in our region with additional choices for how people can get from their homes to where they'd like to go, including the option of not using a car.

- **Visit resource tables and speak with representatives from:**
 - City of Kent's Sustainability Commission
 - City of Kent's Engineering Department
 - City of Kent Parks and Recreation Department
 - PARTA and AMATS
- **Participate in a community engagement activity to help:**
 - Identify areas of bike and walk trail segments where there may be a lack of connection from a neighborhood to an existing route
 - Identify areas you would like to see a route created or improved

This important feedback will be considered and reviewed for fit with various applicable infrastructure and climate action planning decisions moving forward. All are welcome and we hope to see you there!
